

ASMIT DATTA

New York, NY · asmit77@icloud.com · asmit.space · linkedin.com/in/asmitrajeet

EDUCATION

New York University

M.S. in Computer Science

New York, NY

Expected 2028

Arizona State University

B.S. in Computer Science, Minor in Business

Tempe, AZ

May 2026

EXPERIENCE

Software Engineer Intern (Capstone)

WatchDNA

Aug 2025 – Apr 2026

Ontario, Canada (Remote)

- Built WatchDNA's store locator: an interactive Mapbox map with real-time filtering, an admin console for data operations, and a Python pipeline that discovers retailer endpoints on its own
- Shipped a companion app on the same infrastructure, reusing the auth, security, and data layers
- Set up the backend from scratch - databases, JWT authentication with role-based access, and the security middleware around it

Software Engineer Intern

MyYogaTeacher

May 2025 – Jan 2026

San Diego, CA (Remote)

- Shipped a voice-to-SQL pipeline on Whisper with streaming LLM responses that replaced the admin team's Ctrl+F-and-edit workflow
- Wrote the React Native client that streams biometric data in real time, with offline-first sync and time-series deduplication so nothing is lost when the network drops

Technical Officer

The AI Society at ASU

Aug 2025 – Jan 2026

Tempe, AZ

- Mentored four freshmen through their first ML project, an emotion detection system reading facial expressions and audio cues
- Wrote the materials for and ran workshops that made machine learning approachable to students with no technical background

Research Study Assistant

University of Delhi

May 2024 – Aug 2024

New Delhi, India

- Worked under Prof. R. P. Singh on optimizing Gaussian Process classifiers for high-dimensional data

Software Engineer Intern

Flickmatch

May 2023 – Aug 2023

New Delhi, India

- Revamped Flickmatch's website end to end, turning the new Figma designs into responsive React and Material-UI components across every page
- Wrote the state management as modular pieces rather than per-page, so the same logic carried across the site as it grew

PROJECTS

Torii

asmit.space/kya

2026

TypeScript, Bun, Hono, SQLite

- Put an MCP proxy between AI agents and the paid tools they call, enforcing identity, policy and budget on every request: JWT agent identity, a JSON policy engine, and a SQLite ledger recording every call and every reason one was blocked
- Handled the x402 payment flow end to end - intercept the HTTP 402, check the wallet, pay, retry - with a budget tracker that reserves funds before the upstream call so two agents cannot overspend at once; the whole thing ships on two production dependencies

Lead Engine

asmit.space/lead-engine

2026

Python, FastAPI, React, SQLAlchemy

- Built an autonomous lead pipeline that scouts, deduplicates, scores and calls - 2,129 leads sourced

Pash

asmit.space/pash

2026

AWS S3/SQS, Demucs v4, CUDA

- Split songs into vocals, drums, bass and instrumentals with Demucs v4 - uploads land in S3, jobs queue through SQS, and separation runs on a remote CUDA worker, 5-10x faster than on CPU

Portfolio

asmit.space

Three.js, Blender, React

- Modeled my own room in Blender and put it in the browser with Three.js - you walk up to the desk, click the machine, and every project opens as its own artifact instead of a list of links

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML/CSS, Go, Java, C++, Rust

AI & Agents: MCP, x402, LangChain, OpenAI API, Claude API, Whisper, Pinecone, Autonomous agents, Tool use, Prompt engineering, spaCy

Backend & APIs: Node.js, Express, FastAPI, Flask, Bun, Hono, REST, GraphQL, WebSocket, JWT, Role-based access control, SQLAlchemy

Frontend & Mobile: React, React Native, Expo, Tailwind, NativeWind, Material-UI, Three.js, Blender, Vite, Recharts, Electron, Figma, Mapbox

Data & Cloud: PostgreSQL, Supabase, MongoDB, SQLite, Firebase, AWS, CUDA, Docker, CI/CD, Git, GitHub Actions, Linux, Pytest, Jest
