

ASMIT DATTA

New York, NY · asmit77@icloud.com · asmit.space · linkedin.com/in/asmitrajeet

EDUCATION

New York University <i>M.S. in Computer Science</i>	New York, NY Expected 2028
Arizona State University <i>B.S. in Computer Science, Minor in Business</i>	Tempe, AZ May 2026

EXPERIENCE

Software Engineer Intern (Capstone) <i>WatchDNA</i>	Aug 2025 – Apr 2026 Ontario, Canada (Remote)
- Built WatchDNA's store locator: an interactive Mapbox map with real-time filtering, an admin console for data operations, and a Python pipeline that discovers retailer endpoints on its own - Shipped a companion app on the same infrastructure, reusing the auth, security, and data layers - Set up the backend from scratch - databases, JWT authentication with role-based access, and the security middleware around it	
Software Engineer Intern <i>Flickmatch</i>	May 2023 – Aug 2023 New Delhi, India
- Revamped Flickmatch's website end to end, turning the new Figma designs into responsive React and Material-UI components across every page - Wrote the state management as modular pieces rather than per-page, so the same logic carried across the site as it grew	
Software Engineer Intern <i>MyYogaTeacher</i>	May 2025 – Jan 2026 San Diego, CA (Remote)
- Shipped a voice-to-SQL pipeline on Whisper with streaming LLM responses that replaced the admin team's Ctrl+F-and-edit workflow - Wrote the React Native client that streams biometric data in real time, with offline-first sync and time-series deduplication so nothing is lost when the network drops	
Technical Officer <i>The AI Society at ASU</i>	Aug 2025 – Jan 2026 Tempe, AZ
- Mentored four freshmen through their first ML project, an emotion detection system reading facial expressions and audio cues - Wrote the materials for and ran workshops that made machine learning approachable to students with no technical background	
Research Study Assistant <i>University of Delhi</i>	May 2024 – Aug 2024 New Delhi, India
Worked under Prof. R. P. Singh on optimizing Gaussian Process classifiers for high-dimensional data	

PROJECTS

Torii <i>asmit.space/kya</i>	2026 TypeScript, Bun, Hono, SQLite
- Put an MCP proxy between AI agents and the paid tools they call, enforcing identity, policy and budget on every request: JWT agent identity, a JSON policy engine, and a SQLite ledger recording every call and every reason one was blocked - Handled the x402 payment flow end to end - intercept the HTTP 402, check the wallet, pay, retry - with a budget tracker that reserves funds before the upstream call so two agents cannot overspend at once; the whole thing ships on two production dependencies	
Lead Engine <i>asmit.space/lead-engine</i>	2026 Python, FastAPI, React, SQLAlchemy
Built an autonomous lead pipeline that scouts, deduplicates, scores and calls - 2,129 leads sourced	
Pash <i>asmit.space/pash</i>	2026 AWS S3/SQS, Demucs v4, CUDA
Split songs into vocals, drums, bass and instrumentals with Demucs v4 - uploads land in S3, jobs queue through SQS, and separation runs on a remote CUDA worker, 5-10x faster than on CPU	
Portfolio <i>asmit.space</i>	Three.js, Blender, React
Modeled my own room in Blender and put it in the browser with Three.js - you walk up to the desk, click the machine, and every project opens as its own artifact instead of a list of links	

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML/CSS, Go, Java, C++, Rust	
Backend & APIs: Node.js, Express.js, GraphQL, FastAPI, Flask, Bun, Hono, REST, WebSocket, JWT, Role-based access control, SQLAlchemy	
Frontend & Mobile: React, React Native, Expo, Tailwind, NativeWind, Material-UI, Three.js, Blender, Vite, Recharts, Electron, Figma, Mapbox	
Data & Cloud: PostgreSQL, AWS, Supabase, MongoDB, SQLite, Firebase, CUDA, Docker, CI/CD, Git, GitHub Actions, Linux, Pytest, Jest	
AI & Agents: MCP, x402, LangChain, OpenAI API, Claude API, Whisper, Pinecone, Autonomous agents, Tool use, Prompt engineering, spaCy
