Torii

Mar 2026 – Present

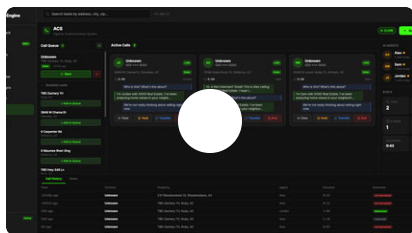

A spending control proxy for AI agents built on the MCP protocol. Torii sits between agents and paid tools, enforcing identity, budgets, and accountability on every call.

Built the full stack in a day with Bun and TypeScript (two production dependencies):

- JWT-based agent identity linking every agent to a human owner
- Policy engine with session budgets, per-call caps, tool allowlists, and rate limits
- Pre-authorization budget tracker that reserves funds before upstream calls to prevent concurrent overspend
- SQLite audit ledger logging every tool call with block reasons and response times
- x402 payment protocol handling - proxy intercepts HTTP 402 challenges, checks wallet balance, pays on the agent's behalf, and retries automatically
- Dual-mode wallet system (simulated for testing, real USDC on Base via viem)
- Live dashboard with real-time spend tracking and agent health monitoring
- Full CLI for server management, token creation, and wallet operations

💎 TypeScript, Bun and +5 skills

LEAD ENGINE

Jan 2026 – Present

Autonomous AI agent that discovers, scores, and generates outreach for real estate leads — 24/7, zero manual intervention.

Scouts Zillow, Redfin, FSBO, expired MLS listings, and county records across an entire metro area. Scores every lead on a Motivation × Ability × Timeline framework, enriches with property history and equity estimates, assigns campaign types based on score tiers, and autogenerates personalized outreach drafts. Full React dashboard with pipeline views, source analytics, and backtesting against historical data.

💎 Python, FastAPI and +9 skills

Pash

Jan 2026 – Present

- Full-stack audio stem isolation platform powered by Demucs v4.
- Upload any song and get back isolated vocals, drums, bass, and instrumentals. Designed a decoupled cloud architecture with AWS S3 for storage, SQS for async job queueing, and remote CUDA
- GPU offloading for 5–10× faster processing than CPU. Clean drag-and-drop UI with real-time job status tracking.

💎 React Native, Tailwind CSS and +5 skills

NeuroPilot

Mar 2025 – Present

- Designed a custom AI-enhanced browser interface that streamlined user workflows by ...

💎 Electron.js, React.js and +1 skill

Portfolio

Feb 2025 – Present

- Built and deployed a 3D interactive portfolio using React + Three.js, allowing users to explore my projects in a virtual ...

💎 Blender, React.js and +4 skills

SentinalAI

Feb 2025 – Present

- Developed a computer vision–based surveillance system capable of real-time detection of... more

💎 Python (Programming Language), YoloV8 and +1 skill

Lynti

Dec 2024 – Present

Developed a transportation app using React Native in an effort to digitize ride booking and ...

💎 Node.js, React Native and +5 skills
