

Asmit Datta

New York, NY | asmit77@icloud.com | <https://linkedin.com/in/asmitrajeet> | <https://www.asmit.space>

PROFESSIONAL SUMMARY

Full-stack software engineer and NYU M.S. CS candidate with a track record of shipping production systems at AI startups: real-time mobile apps, voice-to-SQL pipelines, autonomous AI agents, and payment-gated MCP infrastructure. Comfortable owning the full stack and moving fast in early-stage environments.

EDUCATION

New York University <i>M.S. in Computer Science.</i>	New York, NY 2028
Arizona State University <i>B.S. in Computer Science, Minor in Business. Technical Officer, The AI Society at ASU: led workshops and mentored a 4-freshman team through their first ML project (multimodal emotion detection).</i>	Tempe, AZ 2026

EXPERIENCE

Software Engineer Intern (Capstone) <i>WatchDNA</i>	Aug 2025 – Apr 2026 Remote
- Shipped a store locator with an interactive Mapbox map, real-time filtering, and an admin console for data operations; built an automated Python endpoint-discovery pipeline to keep the store dataset current - Built the full backend from scratch: databases, JWT auth with role-based access, middleware, and security; shipped a companion app on the same stack by reusing the auth and data layers	
Software Engineer Intern <i>MyYogaTeacher</i>	May 2025 – Jan 2026 Remote
- Built a production React Native app streaming real-time biometric data with offline-first sync and time-series deduplication, holding 99.9% uptime on flaky networks - Shipped a voice-to-SQL pipeline using OpenAI Whisper and streaming LLM responses that cut manual admin edit work by 60%	
Software Engineer Intern <i>Flickmatch</i>	May 2023 – Aug 2023 New Delhi, India
Re-engineered web app components from Figma designs and built responsive UIs with Material-UI, tightening visual consistency across the consumer surface	

PROJECTS

Torii https://www.asmit.space/kya	2026
- Built an MCP proxy that enforces identity, policy, budget, and audit between AI agents and paid tools: atomic budget tracking, JSON policy engine, and SQLite audit ledger - Implemented per-agent JWT identity with HTTP 402 handling and per-agent wallets, surfaced through a real-time dashboard for human policy auditing	
Lead Engine https://www.asmit.space/lead-engine	2026
- Built an autonomous AI agent that scouts, scores (Motivation x Ability x Timeline), and calls real estate leads 24/7; sourced 2,100+ leads, hit ~50% AI-call conversion, and cut manual prospecting by 70% - Designed a 5-stage pipeline (scout, dedupe, score, AI voice call, campaign assign) with parallel sub-agents and Telegram alerts, exposed as an interactive node graph	
Pash https://www.asmit.space/pash	2026
Built a full-stack audio stem isolation platform with async job queueing on S3 and SQS and remote CUDA GPU workers, processing tracks 5-10x faster than CPU baseline	
asmit.space, Interactive Portfolio https://www.asmit.space	2024
Modeled a room and desktop in Blender and rendered it in the browser with Three.js as a walkable computer where every project and experience opens as a living artifact	

SKILLS

AI & Agents: OpenAI/Whisper, Claude, MCP, x402, Pinecone, LangChain, Demucs, Selenium
Backend & APIs: Node.js, Express, FastAPI, Flask, REST, WebSocket, GraphQL, Bun, Hono
Languages: TypeScript, JavaScript, Python, SQL, Go, Java, C++, Rust
Frontend & Mobile: React, React Native, Tailwind, NativeWind, Three.js, HTML/CSS
Databases & Cloud: PostgreSQL, MongoDB, SQLite, Firebase, AWS (EC2, S3, Lambda, SQS), Docker, CI/CD
