

ASMIT DATTA

New York, NY · asmit77@icloud.com · asmit.space · linkedin.com/in/asmitrajeet · github.com/sm11t

EDUCATION

New York University New York, NY
M.S. in Computer Science Expected 2028

Arizona State University Tempe, AZ
B.S. in Computer Science, Minor in Business May 2026

EXPERIENCE

Technical Officer Aug 2025 – Jan 2026
The AI Society at ASU Tempe, AZ

- Mentored four freshmen through their first ML project, an emotion detection system reading facial expressions and audio cues
- Wrote the materials for and ran workshops that made machine learning approachable to students with no technical background

Software Engineer Intern (Capstone) Aug 2025 – Apr 2026
WatchDNA Ontario, Canada (Remote)

- Built WatchDNA's store locator: an interactive Mapbox map with real-time filtering, an admin console for data operations, and a Python pipeline that discovers retailer endpoints on its own
- Set up the backend from scratch on Node.js - the database schema, the REST endpoints, JWT authentication with role-based access, and the security middleware around it

Research Study Assistant May 2024 – Aug 2024
University of Delhi New Delhi, India

- Worked under Prof. R. P. Singh on optimizing Gaussian Process classifiers for high-dimensional data

Software Engineer Intern May 2025 – Jan 2026
MyYogaTeacher San Diego, CA (Remote)

- Wrote the React Native client that streams biometric data in real time, with offline-first sync and time-series deduplication so nothing is lost when the network drops
- Shipped a voice-to-SQL pipeline on Whisper with streaming LLM responses that replaced the admin team's Ctrl+F-and-edit workflow

PROJECTS

Torii 2026
asmit.space/kya TypeScript, Bun, Hono, SQLite

- Put an MCP proxy between AI agents and the paid tools they call, enforcing identity, policy and budget on every request: JWT agent identity, a JSON policy engine, and a SQLite ledger recording every call and every reason one was blocked
- Handled the x402 payment flow end to end - intercept the HTTP 402, check the wallet, pay, retry - with a budget tracker that reserves funds before the upstream call so two agents cannot overspend at once; the whole thing ships on two production dependencies

Pash 2026
lnkd.in/p/dCwX6kYm AWS S3/SQS, Demucs v4, CUDA

- Split songs into vocals, drums, bass and instrumentals with Demucs v4 - uploads land in S3, jobs queue through SQS, and separation runs on a remote CUDA worker, 5-10x faster than on CPU

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML/CSS, Go, Java, C++, Rust

Backend & APIs: Node.js, Express.js, FastAPI, Flask, Bun, Hono, REST, GraphQL, WebSocket, JWT, Role-based access control

Data & Cloud: PostgreSQL, Supabase, MongoDB, SQLite, Firebase, AWS, CUDA, Docker, CI/CD, Git, GitHub Actions, Linux, Jest
