

ASMIT DATTA

New York, NY · asmit77@icloud.com · asmit.space · linkedin.com/in/asmitrajeet · github.com/sm11t

EDUCATION

New York University <i>M.S. in Computer Science</i>	New York, NY Expected 2028
Arizona State University <i>B.S. in Computer Science, Minor in Business</i>	Tempe, AZ May 2026

PROJECTS

Portfolio

asmit.space	Three.js, Blender, React
Modeled my own room in Blender and put it in the browser with Three.js - you walk up to the desk, click the machine, and every project opens as its own artifact instead of a list of links	

Pash lnkd.in/p/dCwX6kYm	2026 AWS S3/SQS, Demucs v4, CUDA
Split songs into vocals, drums, bass and instrumentals with Demucs v4 - uploads land in S3, jobs queue through SQS, and separation runs on a remote CUDA worker, 5-10x faster than on CPU	

Lead Engine asmit.space/lead-engine	2026 Python, FastAPI, React, SQLAlchemy
Built a React dashboard over it with a live pipeline graph	
Kept five scout agents running constantly across Zillow, Redfin, FSBO, expired listings and the Maricopa County Assessor, deduplicating by address and scoring every lead on motivation, ability and timeline with the reasoning written out - 2,129 leads sourced	

Torii asmit.space/kya	2026 TypeScript, Bun, Hono, SQLite
Put an MCP proxy between AI agents and the paid tools they call, enforcing identity, policy and budget on every request: JWT agent identity, a JSON policy engine, and a SQLite ledger recording every call and every reason one was blocked	
Handled the x402 payment flow end to end - intercept the HTTP 402, check the wallet, pay, retry - with a budget tracker that reserves funds before the upstream call so two agents cannot overspend at once; the whole thing ships on two production dependencies	

EXPERIENCE

Software Engineer Intern (Capstone) <i>WatchDNA</i>	Aug 2025 – Apr 2026 Ontario, Canada (Remote)
Built WatchDNA's store locator: an interactive Mapbox map with real-time filtering, an admin console for data operations, and a Python pipeline that discovers retailer endpoints on its own	
Set up the backend from scratch on Node.js - the database schema, the REST endpoints, JWT authentication with role-based access, and the security middleware around it	
Shipped a companion app on the same infrastructure, reusing the auth, security, and data layers	

Software Engineer Intern <i>Flickmatch</i>	May 2023 – Aug 2023 New Delhi, India
Revamped Flickmatch's website end to end, turning the new Figma designs into responsive React and Material-UI components across every page	
Wrote the state management as modular pieces rather than per-page, so the same logic carried across the site as it grew	

Software Engineer Intern <i>MyYogaTeacher</i>	May 2025 – Jan 2026 San Diego, CA (Remote)
Produced the initial design for a new app feature from a high-level idea - the diagrams, wireframes and user journeys - and handed it to the development team I was part of, so I built against my own drawings	
Wrote the React Native client that streams biometric data in real time, with offline-first sync and time-series deduplication so nothing is lost when the network drops	
Shipped a voice-to-SQL pipeline on Whisper with streaming LLM responses that replaced the admin team's Ctrl+F-and-edit workflow	

Technical Officer <i>The AI Society at ASU</i>	Aug 2025 – Jan 2026 Tempe, AZ
Mentored four freshmen through their first ML project, an emotion detection system reading facial expressions and audio cues	
Ran workshops and study sessions that made machine learning approachable to students with no technical background, and wrote the materials for them	

SKILLS

Frontend & Mobile: Wireframing, User journeys, Figma, React, React Native, Three.js, Blender, Tailwind, Expo, Material-UI, Vite, Recharts, Mapbox
Languages: TypeScript, JavaScript, HTML/CSS, Python, SQL
Backend & APIs: Node.js, REST, Express.js, FastAPI, JWT, Flask, Bun, Hono, GraphQL, WebSocket, Role-based access control, SQLAlchemy
Data & Cloud: Supabase, PostgreSQL, AWS, SQLite, MongoDB, Firebase, CUDA, Docker, CI/CD, Git
AI & Agents: MCP, OpenAI API, Autonomous agents, x402, LangChain, Claude API, Whisper, Pinecone, Tool use, Prompt engineering, spaCy
